

3M™ Drive-Thru System G5

The sound of success.

A complete drive-thru solution – designed to give you a competitive edge.

Making sure drive-thru orders are handled fast and accurately is a sure way to keep your customers coming back.

Now, 3M science helps you tap the full profit potential of your drive-thru with a communications system that combines unmatched sound clarity with rock-solid reliability and ease of use.

The new 3M™ Drive-Thru System G5 is designed to keep your drive-thru moving quickly and ensure customers are getting exactly what they ordered. The result?

Happier customers. More operational efficiency. Lower costs.

That's the genius of G5.

Self-service in a snap. That's the genius of G5.

Take service into your own hands with the G5's unique modular headset design. You can quickly remove the control pod from the carrier and swap out a new carrier in seconds right in the store, saving you time and money. And every G5 headset system includes an extra carrier, so you can keep the orders coming without interruption.

3M™ Drive-Thru System G5

Simply genius.

Delivering the best possible drive-thru experience for your customer.
That's the genius of G5.

Smart technology for sound drive-thru results

3M's network-ready basestation is the real brains of the system. The 3M™ Drive-Thru Basestation G5 is designed with our most advanced technology, and combined with a new menu post speaker and microphone, delivers superior sound clarity and clearer communication between the order taker and the customer.

Improve order accuracy. Boost customer satisfaction. That's the genius of smarter sound.

- Advanced Noise Reduction delivers superior sound quality for the order taker and at the menu post
- Acoustic Echo Cancellation reduces echoes for clearer sound and easier comprehension
- Automatic Gain Control keeps volume steady and strong
- Spread Spectrum reduces interference

Easier up-sell. Enhanced productivity. That's the genius of the built-in greeter.

- Record up to 16 messages, each up to 10 seconds in length
- Use greeter messages to promote key menu items
- Create alerts and reminder messages to increase compliance and keep your team on task
- Messages can be scheduled by daypart and easily uploaded to the basestation

With a smaller footprint and dual-lane capability in one ingenious basestation, the new 3M™ Drive-Thru Basestation G5 frees up premium wall space in your store. It works with both the 3M G5 and XT-1 headset systems. And, if you're converting your store from a single lane to dual lanes, you can easily upgrade your basestation on-site, in minutes.

A smarter way to connect with customers

The 3M™ Drive-Thru Headset G5 offers a full menu of intelligent features to keep your team connected.

Stay in charge with smart battery technology

Push-button fuel gauge lets you know how much battery charge is left

End-of-battery-life indicator is easy to see and read

Modular design for fast in-store repairs

Patent-pending control pod detaches easily from the carrier for fast and simple repairs. Your headsets never have to leave the store! (See back page for simple headset servicing instructions.)

Haptic "feel" vibration technology in control buttons allows feather-touch operation for increased user comfort

Sleek design, lighter weight and easy adjustment for a perfect fit

Enhanced mic array technology reduces background noise

Flashing blue mic boom lights indicate a customer has arrived at the menu post

Our docking station keeps you powered up, all day long

You've got enough on your plate without having to worry about misplaced or lost batteries. With the G5 system, there's no need to remove batteries from the headset when you need a charge – just insert the headset into the docking station and you're good to go!

- Charges five headsets without having to remove the batteries
- Charges up to five additional batteries
- Can be wall-mounted or used on a tabletop

3M™ Drive-Thru Headset Charging Station G5

Keep your drive-thru running smoothly

Genuine 3M

You'll get all the quality, reliability and safety you've come to expect with 3M. 3M authentication ensures that your drive-thru system is serviced with genuine 3M parts. Only a 3M control pod, carrier and battery, together, will power the 3M™ Drive-Thru Headset G5.

Service that goes above and beyond

3M's world-class repair center helps keep your drive-thru system fully operational throughout the year. From 24/7 technical phone support, to preventive maintenance and fast response repairs with certified technicians, we'll do whatever it takes to keep your drive-thru running smoothly.

We've got your back

The 3M Authorized Dealer network is the largest in the industry. From installation and store-staff training to troubleshooting and system service, 3M Authorized Dealers will help you get the most out of your G5 system. And every 3M drive-thru system includes up to four free on-site service calls during the two-year warranty period, ensuring your drive-thru is always operating at peak performance.

Extended Maintenance Programs

The fast-paced QSR environment can be hard on your drive-thru systems. With proactive maintenance options and value-conscious, factory-certified service, our extended maintenance programs can help you stay a step ahead of repairs.

Ask your 3M Authorized Dealer for complete details.
